

specification

Pile material	100% machine spun coir yarns
Backing	PVC
Total thickness	17mm
Pile weight	2.65kg/m ²
Total weight	5.65kg/m ²
Water absorption	7.1ltr/m ²
Wearing class EN 1963	32
Flammability EN 13501	Ffl
Slip resistance EN 13893	DS
Roll width	1m & 2m

Kersaint Cobb Coir entrance matting is a hardwearing natural fibre product which helps prevent the transfer of dirt into your home. The Coir fibre comes from the dried husks of coconuts, it is durable and can readily receive dyes to colour the fibre offering you six options for your entrance. As a natural fibre it is accepted that shrinkage may occur once fitted and that the colour (which is not colourfast) can change over time and usage. You can also get a shaded line effect which is not a defect but an inherent characteristic of the product. These samples are a guide to the colours available, supplied goods can vary within commercial tolerances.

Coir Matting is designed to be used internally for entrances, helping remove debris and absorb moisture.
