Seasilk offers 3 weave designs in 5m width to maximise your space. The Luxury soft touch fibre has been created to give a sensual feel with the strength that gives long term performance.

Unlike other soft touch fibres, Seasilk allows regular conventional carpet cleaning with no after effects and will stand up the daily use whether in your home or a commercial environment.

Due to the handmade features of this product there may be natural irregularities in both tone and texture. These form part of the inherent character of this beautiful product.

This sample is a representation of the product and may not be from the same batch as current stock.

Installation: Professional installation is recommended. Avoid exposure to direct sunlight.

Maintenance: To maintain the appearance it is recommended that the carpet is vacuumed regularly and thoroughly to prevent soil and dirt becoming embedded in the fibre.
